

PRESS RELEASE

Robur Capital invests in IT Partner's growth

Ledegem, 12 December 2022 – Robur Capital has acquired a majority stake in IT Partner, which specialises in implementing IT infrastructure and ICT services (www.itpartner.be).

With more than 20 years' experience under its belt, IT Partner has built an excellent reputation for itself. It provides businesses with a full array of ICT solutions – ranging from hardware to software, and from installation and integration to support and maintenance. Here is just a sample of what the company has to offer: operating systems and network solutions, back-up and internet services, cloud and security solutions, server virtualisation and consolidation, and advice and support services. IT Partner has its head office in Moorslede in West Flanders and serves clients mainly in the transport and professional SME sectors.

With its majority interest, Robur Capital is aiming to help IT Partner expand further by supporting organic growth and potential targeted acquisitions. Both of the co-founders and managing directors, Patriek Witdouck and Bart Hellin, will remain on board. Systems engineer Stijn Decat (29) will be joining as partner.

“Many companies struggle with ICT,” comments Wim Deblauwe, Managing Director of Robur Capital. “A service provider that really makes life easier for clients and also seeks a long-term personal relationship with them is right at home in the Robur portfolio.”

“Thanks to Robur Capital's involvement, we can tap into the expertise of business leaders in different sectors to help us expand,” says Patriek Witdouck happily. “And having a younger generation in the management team will also ensure the long-term future of IT Partner,” adds Bart Hellin.

This transaction is the fund's ninth investment. The parties involved have agreed not to disclose any further financial details.
